 <p>Example of sketch</p>	<p>Wall Length: _____</p> <p>Shelving Height: _____</p> <p>Shelf Depth: _____</p> <div style="text-align: right; margin-top: 20px;">  </div>
--	--

Use the above space as a guide to measure your space and to sketch out your shelving design.

The distance between the ISS Designs wall standards will vary depending on the length of the wall, location of the wall studs and the type of wall construction. The typical span may range from 16" to 32" apart depending on the amount of weight placed on the shelves. Shelves with books are recommended to have standards placed from 16" to 24" apart. Since the ISS Designs brackets are infinitely adjustable, the shelves may be placed at any height along the vertical wall standard. The top shelf bracket should be at least 6" below the top of the standard. All ISS Designs Wall Standards are mounted to the wall using #6 screws that are provided. You may use your choice of wall anchors if necessary. The recommended wall anchor is the Toggler Brand AF6.
